Is quiet possible at the Dudley home?
Yes,

For more information,
Here are some simple steps to
a quieter home...for the Dudleys
and you.

- Install exhaust fan on rubber mounts.
- Place a foam pad or towel under your typewriter.
- Keep doors and windows closed to prevent disturbing others.
- Use acoustical tile on ceilings.
- Caulk windows and install storm windows to cut down outside noise.
- Replace metal garbage cans with plastic ones.
- Eliminate noise leaks in walls by sealing holes or cracks.
- Drapes are good sound absorbers.
- Seal air leaks around the edge of doors or windows with caulking or weather stripping.
- Use wall-to-wall and stair carpeting with felt or rubber padding to dampen noise.
Keep the stereo volume down
or use earphones or headphones.

Floor vinyls or thick linoleum
will soak up sound.

Buy quiet appliances.

Use vibration mounts under
electrical appliances, including
washer, dryer, and dishwasher.

Wear ear protectors when you are
using equipment or tools that produce
sustained loud sounds.

Put foam pads under blenders, mixers,
and other small appliances.

U.S. Environmental Protection Agency
Noise Office AW-471
Washington, D.C. 20460
EPA is charged by Congress to protect the Nation's land, air, and water systems. Under a mandate of national environmental laws focused on air and water quality, solid waste management and the control of toxic substances, pesticides, noise and radiation, the Agency strives to formulate and implement actions which lead to a compatible balance between human activities and the ability of natural systems to support and nurture life.
